

Blue Pineapple Website Updates - Client Debrief

Date: April 20, 2026 (Nairobi)

Client: Ian

Project: Landing page + Fort Jesus Trip (Hop-On Hop-Off)

Goal

Refresh the website to feel premium, modern, and fully responsive, while clearly communicating the updated Hop-On Hop-Off Fort Jesus experience (water-matatu style along the North Coast).

What We Improved

1) Landing page (Home)

- ? Balanced mobile layout (no sideways scrolling / blank space on small screens).
- ? More premium feel: reduced visual noise, consistent spacing, calmer hero behavior.
- ? Modern section layout on large screens using responsive grid structure.

2) Fort Jesus Trip page

- ? Rebuilt the page hierarchy to emphasize Hop-On Hop-Off immediately after the hero (no longer buried).
- ? Removed redundant/duplicated route UI.
- ? Removed placeholder guest reviews to create space for clean, high-value content.
- ? Added a simple in-page navigation row for faster scanning (Route & Fares / Safety / Departure).

Hop-On Hop-Off: What's Now Captured (from the leaflet brief)

- ? Clear headline/subtitle: Hop-On. Hop-Off. Your Coast.?
- ? Route stops (Mtwapa ? Fort Jesus) presented as a modern horizontal block carousel.
- ? Pricing cards + pricing note (4-7 stops range + per-stop add-on after 3).
- ? Concessions: Children 5-15 (50% off) + Under 5 (Free).
- ? Timetable: depart daily, approximate arrival times, last return by 5:30 PM.
- ? ?How it works? steps: Choose stop ? Board ? Pay on board.
- ? Launch discounts: Kenyan resident + local community discounts.
- ? Fare table kept compact (collapsed preview) to reduce clutter.

Design Notes / UX Decisions

- ? Avoid distracting background video loops; keep motion subtle and purposeful.
- ? Typography standardized to match the landing page's hierarchy.
- ? Keep the UI premium/dark, with controlled accent colors.

Version / Delivery

- ? All changes committed and pushed to main.
- ? Commit: 2145e56 - ?Redesign Fort Jesus hop-on/hop-off and refine home layout?

Items to Confirm With Client

- ? Final wording for hotel partnerships / pickup points (where to mention Serena/Bamburi/Whitesands etc).
- ? Final WhatsApp number and website URL (if any placeholders remain).
- ? Asset hosting plan: keep assets in repo short-term vs migrate to Cloudflare (Images/Stream/R2) for optimization.
